Retrogaming & Retrocomputing : [silicium.org](http://silicium.org)

***A non-profit organization  
for the preservation of  
videogame and  
computer heritage***

Silicium is a french non-profit born in 1994. Our goal is to preserve ancient videogames and computers and show them to people.

Our collection of thousands of items enables us to answer inquiries for exhibitions, meetings or any workshop.

Silicium is an herald of ancient and modern computing. Silicium aims to build an ephemeral, interactive and fun museum. It is renewed every year and enriched to be the partner of your exhibitions. Today, our expertise is widely recognized. Our actions are even more ambitious. We sponsor student projects.

Our approach is as serious as possible, thanks to the support of volunteers and sponsors. As developers of a computer gaming heritage that is rapidly evolving, we are looking for partners to create a permanent museum of gaming and retrocomputing.
